

SIREN INTERMEDIA (Lesser Siren). USA: TEXAS: KINNEY CO.: Imperialist Creek, TX Hwy 131, ca. 2.6 rd km S jct Co Rd 1908 (29.12682°N, 100.44236°W; WGS 84). 11 November 2018. Drew R. Davis and Krista M. Ruppert. Verified by Travis J. LaDuc. Biodiversity Collections, University of Texas at Austin (TNHC 112457 [DRD 5156]). Adult individual (249.5 g, 320 mm SVL, 149

mm tail length) trapped in a baited minnow trap at 0915 h. New county record extending the western boundary of this species in Texas (Dixon 2013. *Amphibians and Reptiles of Texas: with Keys, Taxonomic Synopses, Bibliography, and Distribution Maps*. Third Edition. Texas A&M University Press, College Station, Texas. viii + 447 pp.) and across its known range (Petranka 1998. *Salamanders of the United States and Canada*. Smithsonian Institution Press, Washington, D.C. xvi + 587 pp.; Martof 1973. *Siren intermedia*. *Cat. Am. Amphib. Rept.* 127:1–3). This site was a shallow (ca. 1 m deep) pool with abundant aquatic vegetation with limited connectivity to other nearby pools along Imperialist Creek and is within the Rio Grande watershed. The nearest known records to this individual are from ca. 28 km to the southwest from specimens collected in 1880 near Normandy, Maverick County, Texas (National Museum of Natural History, Smithsonian Institution [USNM] 10856–10862; Goin 1957. *Herpetologica* 13:37–42). We currently recognize this individual as *S. intermedia* but acknowledge that the taxonomic status of this species has not yet been fully resolved. This specimen was collected under a Texas Parks and Wildlife Scientific Collecting Permit (SPR-1018-294) issued to DRD.
