

(Dixon 2013, *op.cit.*). The nearest known record is from ca. 0.3 km to the southwest from Independence Creek, Terrell County (TNHC 98445). We thank J. Chandler and R. Jasso for site access and assistance in sampling efforts, as well as C. McDonald and the Natural Resources Program, Texas Comptroller of Accounts for funding support. Specimens were collected under a Texas Parks and Wildlife Scientific Collecting Permit (SPR-1018-294) issued to DRD.

RAHMAN**, School of Earth, Environmental, and Marine Sciences, University of Texas Rio Grande Valley, 100 Marine Lab Drive, South Padre Island, Texas 78597, USA.

***PSEUDEMYS GORZUGI* (Rio Grande Cooter)**. USA: TEXAS: CROCKETT CO.: Pecos River, ca. 0.3 river km upstream of confluence with Independence Creek (30.44767°N, 101.72119°W; WGS 84). 19 October 2019. Amy P. Bogolin, Krista M. Ruppert, and Drew R. Davis. Verified by Travis J. LaDuc. Biodiversity Collections, University of Texas at Austin (TNHC 114131 [DRD 6080]). An adult male (230 mm SCL, 199 mm PL, 1432.2 g) was collected in a floating hoop trap baited with sardines at 1430 h. A second specimen (TNHC 114132 [DRD 6081]: adult male, 159 mm SCL, 136 mm PL, 505.9 g) was collected nearby (further upstream) in the Pecos River, ca. 0.8 river km upstream of the confluence of Independence Creek (30.45259°N, 101.71940°W; WGS 84) shortly afterwards. A total of seven adult *P. gorzugi* were trapped using baited hoop traps from 18–20 October 2019 at these two locations. Previously, *P. gorzugi* was documented through a drone-based survey at this second location on 5 June 2019. These specimens represent a new county record (Dixon 2013. Amphibians and Reptiles of Texas: with Keys, Taxonomic Synopses, Bibliography, and Distribution Maps. Third Edition. Texas A&M University Press, College Station, Texas. viii + 447 pp.). *Pseudemys gorzugi* is known from adjacent Terrell and Val Verde counties
